

# ABHISHEK DONGARE

## Front-End Developer

abhishekdongare99@gmail.com | 0432006905 | WWW: <http://www.linkedin.com/in/abhishek-dongare-3404331ab> |  
WWW: <https://github.com/Abhishek121099>

## Professional Summary

Front-End Developer with a Master's in IT and hands-on experience building responsive, user-friendly web interfaces. Skilled in React, JavaScript, HTML, CSS, wireframing, and UI/UX design. Passionate about creating clean, intuitive layouts and improving user experience through thoughtful design and development.

## Professional Experience

08/2025 - Current

Weblink Pvt Ltd  
India

### Web Developer

- Contributed to building and updating internal websites and pages using WordPress, HTML, and CSS.
- Created basic wireframes and user flows to support layout planning and improve user experience.
- Assisted in developing and styling forms, dashboards, and internal tools with consistent UI.
- Supported content updates, plugin configurations, and layout tweaks in WordPress.
- Helped test interfaces across browsers and devices to ensure responsiveness.
- Documented common user feedback and front-end changes to support development.

06/2020 - 12/2020

TechSolutions IT Services  
Pvt. Ltd.  
Pune, India

### Junior Software Developer (Intern)

- Built and styled basic web pages using HTML, CSS, and JavaScript
- Gained hands-on experience with React fundamentals and component-based development
- Learned how to connect front-end interfaces to back-end systems using APIs and MySQL
- Worked with form data, basic validation, and displaying dynamic content
- Supported small debugging tasks and browser testing across devices
- Observed and practiced using tools like GitHub for code versioning and collaboration

## Projects

### 1. VETCONNECT – Online Veterinary Appointment System

Live link: [vetconnectapp.netlify.app](http://vetconnectapp.netlify.app)

James Cook University | Sept 2023 – May 2024

- Built a full-featured veterinary clinic management system with React.js and Vite, focused on user experience and responsiveness.
- Developed pages for booking appointments, scheduling services, managing pet records, and displaying user dashboards.
- Implemented user authentication, protected routes, and persistent login using localStorage.
- Designed a clean, mobile-first UI with modern layouts, animations, and interactive components.
- Created reusable React components and structured the app for easy scalability and future backend integration.

### 2.E-Commerce Analytics Dashboard

Live link : [ecommerce-analytics-dashboard.netlify.app](http://ecommerce-analytics-dashboard.netlify.app)

- Created a simple dashboard to show e-commerce performance using React and Chart.js.
- Displayed data for visitors, orders, revenue, and conversion rates with interactive charts.
- Used filtering to update charts by date, device, and product category.
- Designed a responsive layout with a clean, modern UI.
- Fetches live data from an API and used fallback data when offline.

Education

10/2024	Master of Information Technology in Computing and Networking
Brisbane	James Cook University
	Distinction in Web Development, Programming, and Database Management

Certifications and Memberships

- React Essential Training – LinkedIn Learning, Dec 2025
- Data Analysis with SQL, Tableau, Power BI & Excel – Udemy, Feb 2025
- Troubleshooting IT Remote Administration – LinkedIn Learning, May 2025
- Member, Australian Computer Society (ACS) – Since 2024

Technical Skills

- Front-End Development Tools

  - HTML5, CSS3, JavaScript
  - React
  - Figma (wireframing & UI prototyping)
  - Responsive Web Design
  - API Integration
- WordPress, Elementor
  - Git & GitHub
  - Jira, Slack
  - SQL/MySQL
  - Troubleshooting & debugging

Soft Skills: UI awareness • Problem-solving • Clear communication

• Attention to detail • Collaboration • Adaptability

Design Sprints & Innovation Workshops

- Brisbane Botanical Garden App Design Sprint
- Participated in a collaborative sprint to design a mobile app for the Brisbane Botanical Garden.
  - Focused on improving visitor experience through interactive maps, plant information, and guided tours.
  - Contributed to UI/UX design, prototyping, and presenting the final concept to academic reviewers.
- Student Wellbeing App – James Cook University
- Designed an app concept to support student mental health and well-being.
  - Conducted user research to identify key needs and features including mindfulness tools, event notifications, and campus resources.
  - Worked on user interface design and wireframes, contributing to the final pitch presentation.
